

My Child Is Escaping From Their Car Seat!

What Can I Do?

Resources are available to help you!

Contact a Child Passenger Safety Technician. They can help with:

- ✔ **Selecting an appropriate car seat for your child's height, weight, and developmental level.**
- ✔ **Proper car seat installation.**
- ✔ **Proper positioning and harnessing of your child.**

Scan the QR Code above to find a Child Passenger Safety Technician near you.

This isn't working - what can I try next?

Consult with teachers and other providers to assist with potential behavior modifications during travel, such as:

- ✔ **Providing consistent expectations.**
- ✔ **Developing reward or praise systems.**
- ✔ **Determining potential reasons your child might be escaping - like loud noises or sensory issues.**
- ✔ **Providing opportunities for movement before travel and with breaks on long trips.**

My child is still escaping...

Meet with a physical therapist or occupational therapist who can:

- ✔ **Assist you with an assessment for a specialized adaptive car seat for you child.**
